SUMMARY

UI/UX Designer and 4th-year Information Technology student with hands-on experience designing responsive websites, high-fidelity interfaces, prototypes, and digital products using Figma and Adobe tools. Experienced in creating user-centered layouts, improving content hierarchy, preparing developer-ready designs, and supporting front-end implementation. Seeking a UI/UX Designer Intern role where I can contribute to real world product design, collaborate with teams, and continue improving through user-focused design practice.

EXPERIENCE

Future You Believe Technology (FYB Technologies) November 2025 – May 2026
UI/UX Designer Intern

- Designed responsive website interfaces for Neto Payment, Intensity Global, and FYB Technologies, focusing on layout structure, visual hierarchy, usability, and professional brand presentation.
- Created high-fidelity UI designs and website concepts in Figma for BeVegas and Win777Live, improving interface clarity for gaming platform pages.
- Collaborated with developers to refine front-end implementation, fix UI inconsistencies, test responsive layouts, and prepare websites for deployment.
- Produced 100+ game icons and 10+ branded social media materials while maintaining consistent sizing, visual style, and brand alignment.

LITERATES COMMUNITY – NU BALIWAG

Public Relations Officer July 2024 – July 2025

- Led the organization's public presence, overseeing all publicity materials and creative campaigns.
- Produced posters, graphics, video teasers, and managed event technical visuals and audio.
- Mentored committee members, delegated tasks, and strengthened team design capabilities.

CENTRAL STUDENT GOVERNMENT – NU BALIWAG

Graphics and Multimedia Director Aug 2023 – July 2024

- Managed and published all multimedia content across official social media platforms.
- Designed motion graphics, LED visuals, and promotional materials for major university events.
- Led digital creative initiatives, including supervising a Digital Poster Making competition.

Photo and Videography Committee

July 2023 – July 2023

- Assisted in video production setup and edited promotional content for events.
- Collaborated with cross-disciplinary teams to deliver multimedia outputs.

PROJECT

Smart Stick: Specialized Mobility Assistance & Responsive Technology Stick

BSIT Capstone Project, Role: UI/UX Designer & Mobile Developer

- Designed the caregiver mobile app interface in Figma, focusing on location monitoring, emergency alerts, profile management, and accessible navigation.
- Created app screens and user flows for caregiver tracking, SOS alerts, GPS location updates, and smart stick device status monitoring.
- Built the mobile app using FlutterFlow and Firebase to support real-time data storage, user records, and emergency alert updates.
- Collaborated with the hardware team to connect GPS, GSM, and sensor-based features with the mobile app experience.
- Improved the product concept by designing a clearer support system for caregivers assisting blind and visually impaired users.

TECHNICAL SKILLS

UI/UX Design: Wireframing, High-Fidelity Design, Prototyping, User Flows, Responsive Web Design, Visual Hierarchy, Usability Testing, Design Systems, Developer Handoff

Design Tools: Figma, Adobe Photoshop, Adobe Premiere Pro, Adobe After Effects, Magnific
Front-End: HTML, CSS, JavaScript, PHP

Database & Tools: Firebase, MySQL, GitHub, FlutterFlow, Visual Studio Code
